

Fabricator / Welder

Award winning, South West engineering Company, Blackhill Engineering Services, specialise in large build to print manufacturing, fabrication and machining. The Woodbury (Exeter) based organisation is looking to expand its operations team with an experienced fabricator to support the company's on-going expansion into the Nuclear Industry.

As an Experienced Fabricator / Welder the successful candidate will be able to follow detailed work instructions, technical drawings relating to the welding and fabrication of component parts and large assemblies. This will include but not limited to, ferrous and non-ferrous material, use of Mig/Tig, plasma profiler, guillotine and press brake.

Reporting to the Fabrication Manager, the individual must be able to fit into an existing experienced team and work to the highest of standards, maintaining efficiencies and quality.

The position is permanent full time at 40hr / week, Monday to Thursday 8am – 5.15 pm and Friday 8am - 1pm.
